

Serial No.: 09/501,134

Attorney Docket No.: 00P7458US

**IN THE CLAIMS:**

This listing of the claims will replace all prior versions and listings of the claims in the application:

1. (Original) A method for updating configuration information in a TAPI system, comprising:
  - storing configuration information in a first configuration table object;
  - requesting update static configuration information from a telephony device;
  - receiving said update static configuration information; and
  - storing said static update configuration information for system use as a second configuration table object.
  
2. (Original) A method in accordance with claim 1, further comprising generating a deleted devices configuration table object and an added devices configuration table object.

9. (New) A TAPI system, comprising:

a TAPI service provider adapted to store configuration information received from a telephony device in a first configuration table object; and

a telephony device adapted to transmit update static configuration information to said TAPI service provider;

wherein said TAPI service provider is adapted to store said static update configuration information for system use as a second configuration table object.

10. (New) A system in accordance with claim 9, said TAPI service provider further adapted to generate a deleted devices configuration table object and an added devices configuration table object.

11. (New) A system in accordance with claim 6, said TAPI service provider further adapted to notify a TAPI application that each device in said deleted devices
